Did you know we are supposed to cover our bodies in 30ml or one shot glass full of sun cream every two hours whilst we are in the sun? A third of us don't wear any barrier cream at all! Well luckily, Organic Homme have launched a face cream which protects, moisturises and has anti-ageing properties. The spf15 cream is made from organic and fairly traded ingredients and leaves you smelling like a divine herb garden.

From the same people that bring you the face cream above comes a roll-on deodorant that really does work. After tests we found Organic Homme Stay Cool Deo 9 to be quite good at keeping you dry. It's 89% organic, with a natural smell of mint, lavender and eucalyptus. But, best of all, it's free from any pore-clogging aluminium, parabens, alcohol or any other harsh ingredients.
